

aFuel

The Digital Fueling Network

aFuel – The Future of Digital Aviation Fueling!

In an industry where every minute counts, **aFuel** delivers the digital transformation fueling has been waiting for.

Instead of complex, paper-based and error-prone processes, **aFuel** enables a fully digital communication between airlines and into-plane agents – fast, secure and efficient.

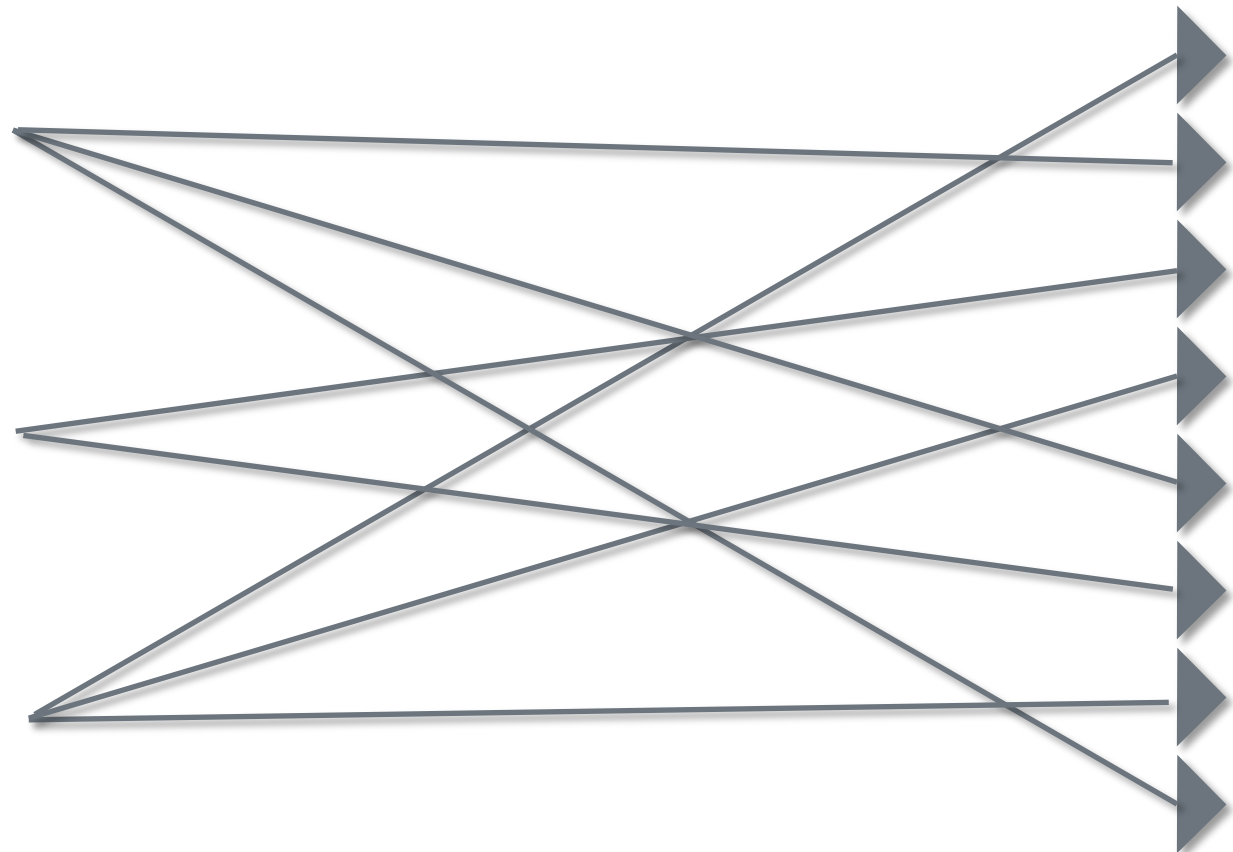

Countless Interfaces – Endless Complexity

Airlines

Into Plane Agents

Without a fuel

Countless connections.

Airlines are forced to build and maintain individual interfaces for every into-plane agent – turning each new airport or provider change into a costly IT project.

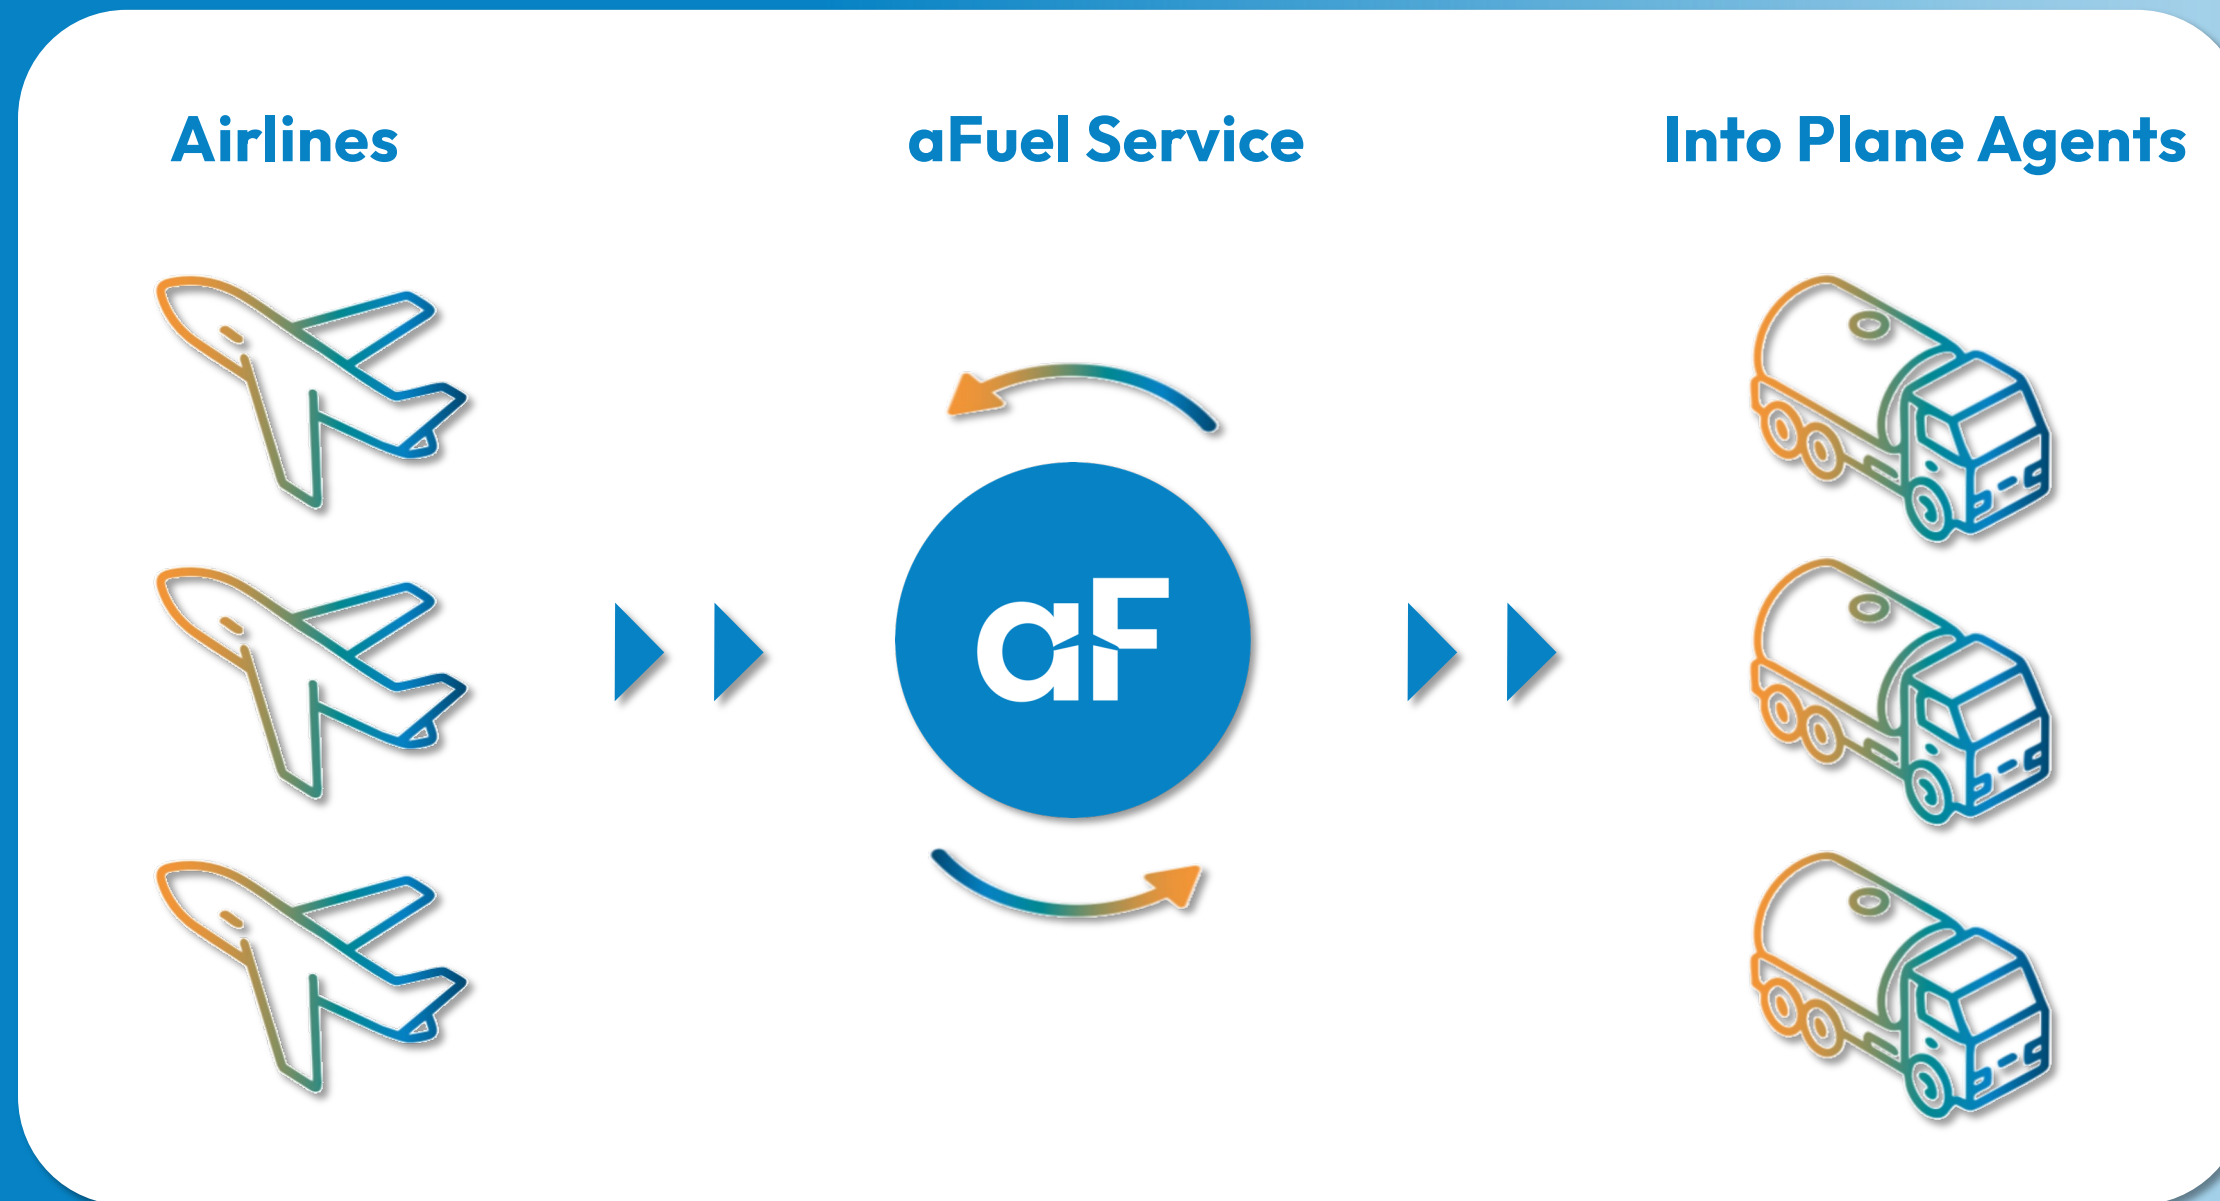

Endless complexity.

This creates unnecessary complexity, delays and expense.

Complicated fueling.

Such a fragmented approach will never lead to a unified digital fueling process across an airline's network.

One Integration – Endless Connections

With afuel

One connection.

With aFuel, a single integration unlocks the entire world of digital fueling.

Seamless fueling.

No need to connect with each into-plane agent individually – we've already done it for you.

Global reach.

Once integrated, airlines gain instant access to all current and future partners in the aFuel network.

Start your digital fueling journey now and benefit from the global aFuel fueling network without any system boundaries.

aFuel combines all the features of digital fueling.

There's simply no reason not to use it!

Digital

From the very first order to final confirmation – every step runs paperless and in real time.

Future-proof

High data quality and accuracy ensure greater efficiency, fewer errors and long-term reliability.

Independent

aFuel connects airlines and fuel suppliers seamlessly, no matter which systems they use.

IATA AIDX Standard

Fully aligned with international messaging standards to ensure smooth, reliable integration.

Global & Scalable

Already live at 300+ airports – with worldwide expansion underway.

Cockpit-ready

Directly accessible through the Electronic Flight Bag (EFB) – no extra devices required – for maximum efficiency in the cockpit.

Open Platform: The Key to a Unified Fueling Network

Why we believe in the open platform approach

One unified process across the network

Standardized aFuel fueling workflow at every station, independent of local IPA systems.

Complete supplier & IPA flexibility

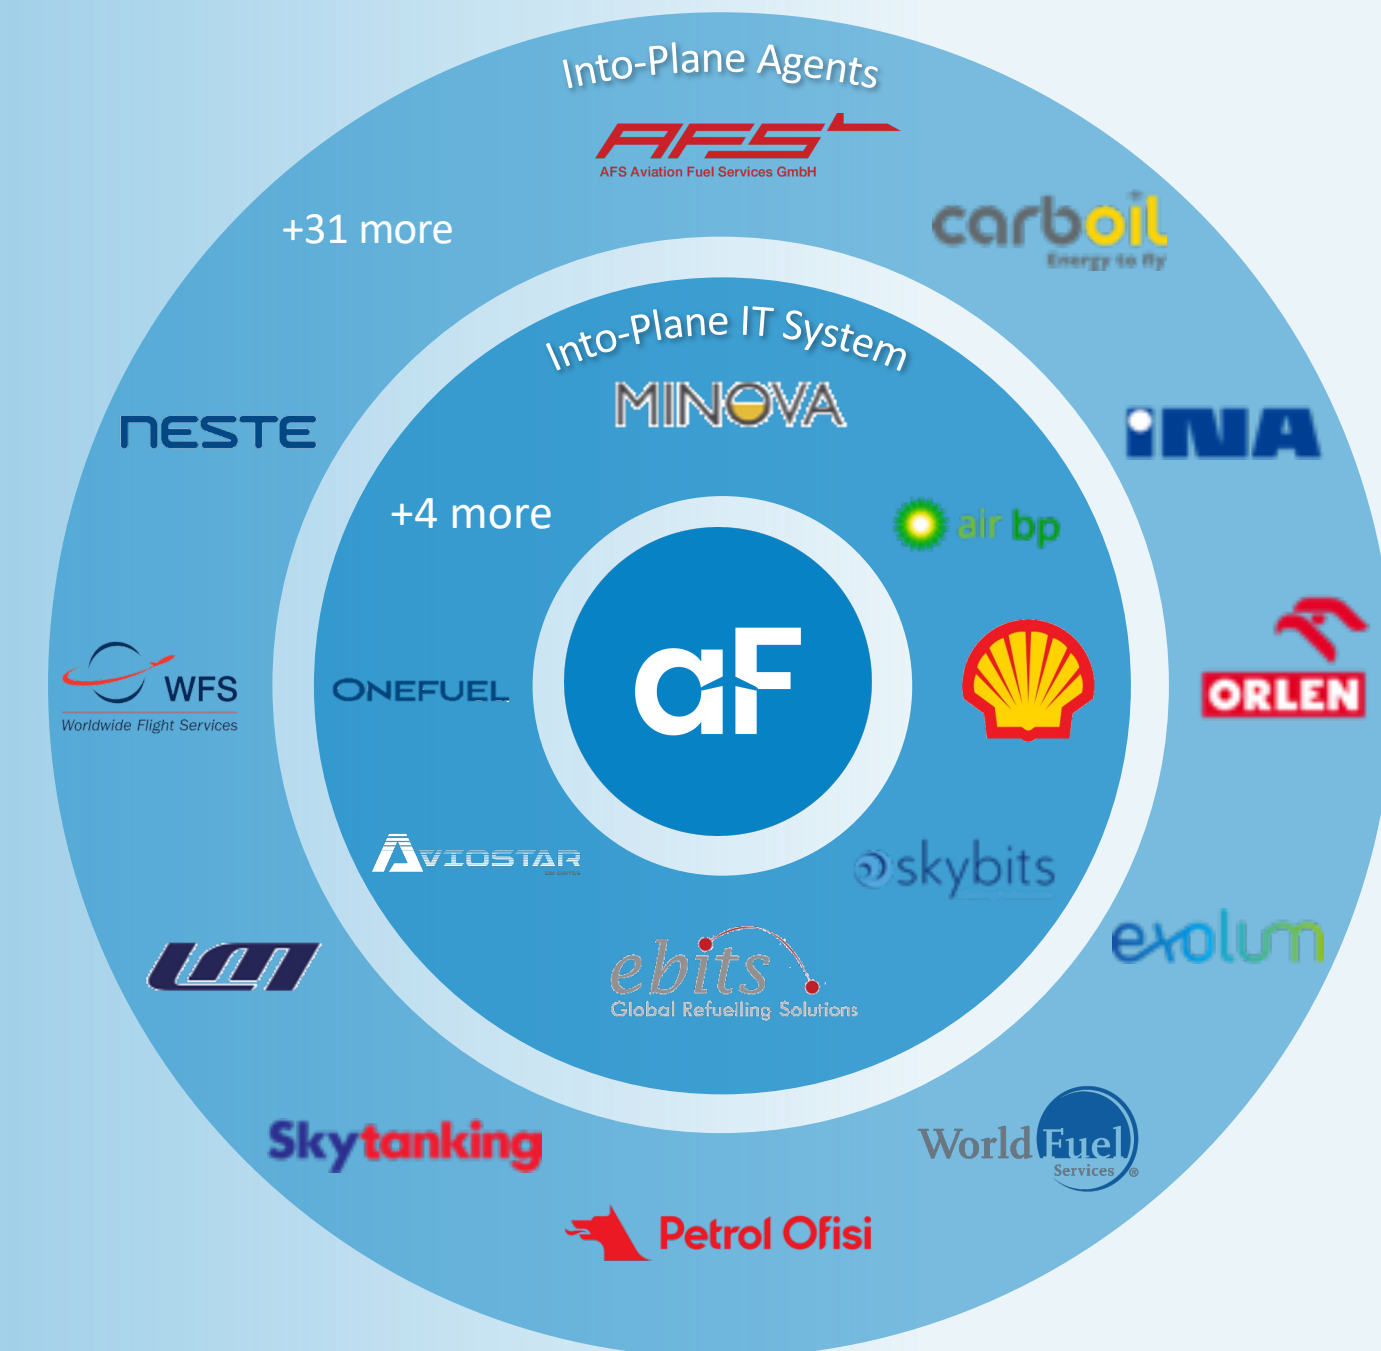

Already integrated with eleven major into-plane agent dispatch systems, ensuring freedom of choice without compromising pricing over digital fueling.

Rapid network expansion

Enabling airlines to establish a digital fueling process quickly and network-wide; covering 100% of flights is only possible with this approach.

Consistent digital experience

Pilots, flight/ground ops and fuel management teams benefit from one fueling process and perfect data quality, regardless of providers.

Digital fueling with afuel

Many of the world's leading airlines already benefit from increased efficiency & cost savings

...How does the **aFuel** process look like?

Digitalized fueling from initial order to final fuel slip

The **aFuel** Vision

Worldwide coverage & limitless digital connectivity.

Shaping a smarter, more connected future for every airline worldwide.

Growing efficiency & transparency across the entire aviation fueling value chain.

Information Design

Data-management solutions tailored to the aviation industry

25 years of aviation expertise

We are aviation natives. Our deep understanding of the unique challenges and opportunities in aviation enables us to develop solutions that are technically robust and provide answers to real-world operational needs.

50+ dedicated data & aviation specialists

We are a team of experienced professionals whose dedication and creativity turn our solutions into something truly exceptional. Our passion, aviation expertise and commitment to excellence drive the innovative approaches that set us apart.

Tailored products & services

Our products have been tailored, refined and perfected in close cooperation with global aviation leaders, ensuring they meet the highest operational standards and deliver measurable results.

Strong partnerships

We believe in a partnership-driven approach, working closely with our clients to foster collaboration, mutual trust and long-term success.
